I . Health Development in the Period of the 11th Five-Year Planand 2010 Health Wbrk Review
(1)Health development achievements in the period of the 11 mFive-Year Plan . The period of the 11m Five-Year Plan was a trulyextraordinary time in the course of the country's healthdevelopment . It was also a time for the Dew situation of healthwork . In the past five years , a new idea for health reform anddevelopment has been firmly established . After the turn of thecentury,especially after the anti—SARS campaign , the CPC CentralCommittee put forward the scientific outlook on development . Theoutlook established the concept of development for people , relyingon people and shared by people , which highlighted healthdevelopment . The 17th CPC National Congress set the goal thateveryone would have access

to basic medical and health services . In addition, the Congress pointed out a basic direction that public medical and health care services serve the public good . It also made clear the historical task of establishing a basic medical and health care system . Over the five years , the national health system has firmly established aim awareness and a concept of health services for the people wholeheartedly . The maintenance of the people's interests has been taken as the starting point and foothold of health work . Around the most practical health issues of the greatest and most direct concern to the people, all thinking was unified , development thoughts were adjusted , weak links were strengthened, operation mechanism was restructured, and service effectiveness was improved . On the whole , the scientific development concept of being people and health oriented was truly achieved in health work . That is the ideology foundation for the achievements of health work . It is also important spiritual treasure which is worth summarizing and carrying forward . In the past five years , a new way of thinking for health reform and development has been set . On the basis of years of exploration, the CPC Central Committee and the State Council formulated Opinions on Deepening the Reform of Medical and Health System . In the Opinions , the general idea , basic framework , policies and measures and recent work focus of reform were clarified . By way of institutional innovation, conflicting issues around system , mechanism and structure would be settled . In addition , the people's health benefits would be maintained by the basic system . According to the principle of providing the people with the basic medical and health care system as public products , “ basic medical care should be guaranteed , primary care strengthened, and medical mechanism established ” . Over the past two years,
