

# 《胎儿与新生儿重症护理（第2版）Intensive Care of the Fetus and Neonate》

## 书籍信息

版次：1

页数：1440

字数：

印刷时间：2005年03月01日

开本：大16开

纸张：胶版纸

包装：精装

是否套装：否

国际标准书号ISBN：9781560535126

## 内容简介

This brand-new 2nd Edition represents a complete revision of one of the major textbooks of neonatal-perinatal medicine. Readers will find state-of-the-art management strategies for virtually every aspect of the fetus and the critically ill newborn infant. It offers a practical approach to fetal development, fetal diagnosis and monitoring, the medical and surgical management of high-risk pregnancies, and a step-by-step approach to pulmonary and critical care techniques used on premature and sick neonates.

Includes information on the neonatal period, as well as the full perinatal period.

Discusses techniques such as, fetal echocardiography, delivery room resuscitation, imaging, neonatal bronchoscopy, high-frequency jet ventilation, liquid ventilation, endotracheal intubation, thoracentesis and chest intubation,, and much more.

Discusses diagnostic, assessment, and intervention techniques for the fetus. This brand-new 2nd Edition represents a complete revision of one of the major textbooks of neonatal-perinatal medicine. Readers will find state-of-the-art management strategies for virtually every aspect of the fetus and the critically ill newborn infant. It offers a practical approach to fetal development, fetal diagnosis and monitoring, the medical and surgical management of high-risk pregnancies, and a step-by-step approach to pulmonary and critical care techniques used on premature and sick neonates. Includes information on the neonatal period, as well as the full perinatal period.

Discusses techniques such as, fetal echocardiography, delivery room resuscitation, imaging, neonatal bronchoscopy, high-frequency jet ventilation, liquid ventilation, endotracheal intubation, thoracentesis and chest intubation,, and much more. Discusses diagnostic, assessment, and intervention techniques for the fetus. Features an interdisciplinary approach to management, including neonatal nutrition \* pediatric microbiology/immunology \* pediatric nephrology \* pediatric pharmacology and therapeutics \* pediatric neurology \* obstetrics and gynecology \* and others. Discusses the hottest topics in the field, including the genetics of development and common genetic problems \* stem cell and gene therapy \* pharmacology in the fetus and newborn \* the surgery of fetal malformations \* maternal illness and the effects on the fetus \* management of multiple gestations \* high-frequency oscillatory ventilation \* viral infections of the fetus and neonate \* neonatal ethics and epidemiology. Delivers up-to-the-minute guidance on cardiac assessment. Provides the latest information on fetal surgical interventions, including the latest data on fetal surgery results, as well as the latest information on neonatal neurological diagnosis and outcome. Includes the most current information on neonatal neurological diagnosis and outcome. Presents new approaches to genetic therapy in the fetus and neonate.

## 目录

History of Fetal and neonatal Intensive Care

Fetal Development

Fetal Diagnosis

Assessing Fetal Well-Being

Fetal Intervention

Maternal Factors Influencing Neonatal Outcome

Management Considerations in the High-Risk Pregnancy

Neonatal Resuscitation

Intensive Care of Neonates: General COnsiderations

Pulmonary Disease in the Neonate

Neurologic Considerations in the Neonate

Cardiovascular Disease in the Neonate

Nutritiion and Gastrointestinal Tract of Neonates

Liver and Biliary Tree of the Neonate

Infection and the Neonate

Metabolic and Endocrine Disorders of the Neonate

Renal Disorders in the Neonate

Hematologic Problems in the Neonate

Surgical Management of the Neonate

Ethical Considerations in Neonates
