内容简介

How did the replication bomb we call life begin and where in the world, or rather, in the universe, is it heading? Writing with characteristic wit and an ability to clarify complex phenomena (the New York Times described his style as the sort of science writing that makes the reader feel like a genius), Richard Dawkins confronts this ancient mystery.

作者简介

Richard Dawkins is an evolutionary biologist renowned throughout the world. He was educated at Oxford and taught zoology before becoming the first holder of the Charles Simonyi Chair of the Public Understanding of Science at Oxford University, in 1995. His previous books rank among the most influential intellectual works of our time., They include THE SELFISH GENE (1976), RIVER OUT OF EDEN (1995), and UNWEAVING THE RAINBOW (1999). --This text refers to an out of print or unavailable edition of this title.
