内容简介

Design for Lean Six Sigma is the only book that employs a "road-map" approach to DFSS, which allows corporate management to understand where they are in the process and to integrate DFSS methodology more fully into their overall business strategy. This is a similar approach to that used by Forrest Breyfogle in his successful book: "Implementing Six Sigma, 2E". This approach will allow corporate management to understand where they are in the process and to integrate DFSS methodology more fully into the overall business strategy. Another important aspect of this book is its coverage of DFSS implementation in a broad range of industries including service and manufacturing, plus the use of actual cases throughout.

作者简介

Dr. Rajesh Jugulum is a Vice President of the Global Wealth and Investment Division of Bank of America. He is also affiliated with the robust design group at the Massachusetts Institute of Technology. He has published several articles in leading technical journals and magazines and coauthored two books related to Mahalanobis-Taguchi Strategy and Computer-Based Robust Engineering with Dr. Genichi Taguchi, in addition to holding a U.S. patent. He is the recipient of the 2002 American Society for Quality's Feigenbaum Medal and the 2006 International Technology Institute's Rockwell Medal. He was inducted into the World Level of the Hall of Fame for Engineering, Science, and Technology in 2006 and in the same year, was listed in Who's Who in the World by Marquis Who's Who publication board. He was featured as the "Face of Quality" in September 2001 issue of Quality Progress.
