

《电力专业英语(张华)》

书籍信息

版次：1

页数：150

字数：216000

印刷时间：2008年10月01日

开本：16开

纸张：胶版纸

包装：平装

是否套装：否

国际标准书号ISBN：9787560949291

内容简介

本书涉及电力行业的多个领域，包括电力系统、发电厂、电力设备、输配电系统、继电保护、新能源发电等。

全书共8章，分别为现代电力系统的一般特性、发电厂、变压器、输配电系统及输电线路、断流器和开关设备、继电保护设计和继电器、电力系统继电保护、可再生能源。

本书可作为高等院校电力专业的教学用书，也可用作电力企业工程技术人员学习专业英语的培训教材。

目录

Chapter 1 General Characteristics of Modern Power Systems

Part 1 Evolution of Electric Power Systems

Part 2 Structure of the Power System

Part 3 Power System Control

Part 4 Design and Operating Criteria for Stability

Chapter 2 Power Generating Stations

Part 1 Hydropower Stations

Part 2 Thermal Stations

Part 3 Nuclear Stations

Chapter 3 Power Transformer

Part 1 The Basic Principles

Part 2 Transformer Equivalent Secondary Impedance

Part 3 Three Phase Transformer Connections

Chapter 4 Transmission System and Transmission Lines

Part 1 General Introduction of the Transmission System

Part 2 Considerations for Transmission Lines and Cables

Part 3 Circuit Parameters of Transmission Lines and Cables

Part 4 Types of Transmission Conductors

Chapter 5 Circuit Breakers and Switches

Part 1 Circuit Breakers

Part 2 Switches

Part 3 Recloser and Sectionatizer

Part 4 Surge Attester

Chapter 6 Protection Design and Relays

Part 1 Introduction

Part 2 The Application of Protective Relaying--Protection Zones

Part 3 Protection System Characteristics

Part 4 Protection Principles

Chapter 7 Power System Protection

Part 1 Protection of Generators

Part 2 Protection of Transformers

Part 3 Bus Protection

Chapter 8 Renewable Energy Sources

Part 1 Importance of Renewable Energy Application

Part 2 Solar Energy

Part 3 Wind Power

Part 4 Biomass

Part 5 Hydrogen

Part 6 Geothermal

Part 7 Ocean Energy

Part 8 Distributed Energy and Production

附录A Supplements

附录B 词汇表
