

# 《Java大学教程（第九版）（英文版）》

## 书籍信息

版次：9

页数：1152

字数：2756000

印刷时间：2017年06月01日

开本：16开

纸张：胶版纸

包装：平装-胶订

是否套装：否

国际标准书号ISBN：9787121317606

丛书名：国外计算机科学教材系列

## 内容简介

本书是关于Java语言编程的优秀教材之一，秉承Deitel系列丛书的一贯特点：内容丰富、覆盖面广，提供详细代码与实例研究，总结出大量的面向对象编程技巧和经验。本书详细说明了在Java中面向对象编程的基本理论及实用知识，由初学者为起点，由点到面、由浅入深、循序渐进地介绍了事件处理、对象、接口、内置类、继承、多态性、数据结构和集合、查找与排序、流文件、applet、图形用户界面及多线程等，并且详细介绍了网络应用的开发与实践。第九版在前一版的基础上增加了更多的实际案例，更新了很多内容，有助于读者学习和借鉴。本书包括更广泛的教学特性，其中列举了数百个可实际使用的程序实例，并给出实际的运行结果，可以使学生在学习时更为直观。

## 作者简介

Paul Deitel和Harvey Deitel是全球畅销的编程语言教材和专业图书作家，“How to Program”系列是其最负盛名的一套计算机编程教材，已经销售近40年，并被翻译成中文在内的十几种语言。他们成立的Deitel & Associates公司是一家国际知名的企业培训和写作公司，专门进行计算机编程语言、对象技术、移动应用开发及Internet和Web软件技术方面的培训和写作，出版了一流的编程专业的大学教材、专业图书以及LiveLessons视频课程。Paul Deitel和Harvey Deitel是全球畅销的编程语言教材和专业图书作家，“How to Program”系列是其最负盛名的一套计算机编程教材，已经销售近40年，并被翻译成中文在内的十几种语言。他们成立的Deitel & Associates公司是一家国际知名的企业培训和写作公司，专门进行计算机编程语言、对象技术、移动应用开发及Internet和Web软件技术方面的培训和写作，出版了一流的编程专业的大学教材、专业图书以及LiveLessons视频课程。

## 目录

### Contents

#### Chapter 1 Introduction to Computers and Java 1

##### 1.1 Introduction 2

##### 1.2 Computers: Hardware and Software 4

##### 1.3 Data Hierarchy 5

##### 1.4 Computer Organization 6

##### 1.5 Machine Languages, Assembly Languages and High-Level Languages 7

##### 1.6 Introduction to Object Technology 8

##### 1.7 Operating Systems 10

##### 1.8 Programming Languages 12

##### 1.9 Java and a Typical Java Development Environment 14

|      |                                                                        |     |
|------|------------------------------------------------------------------------|-----|
| 1.10 | Test-Driving a Java Application                                        | 17  |
| 1.11 | Web 2.0: Going Social                                                  | 21  |
| 1.12 | Software Technologies                                                  | 23  |
| 1.13 | Keeping Up-to-Date with Information Technologies                       | 24  |
| 1.14 | Wrap-Up                                                                | 24  |
|      | Chapter 2 Introduction to Java Applications                            | 29  |
| 2.1  | Introduction                                                           | 29  |
| 2.2  | Your First Program in Java: Printing a Line of Text                    | 30  |
| 2.3  | Modifying Your First Java Program                                      | 35  |
| 2.4  | Displaying Text with printf                                            | 36  |
| 2.5  | Another Application: Adding Integers                                   | 37  |
| 2.6  | Memory Concepts                                                        | 41  |
| 2.7  | Arithmetic                                                             | 42  |
| 2.8  | Decision Making: Equality and Relational Operators                     | 45  |
| 2.9  | Wrap-Up                                                                | 48  |
|      | Chapter 3 Introduction to Classes, Objects, Methods and Strings        | 58  |
| 3.1  | Introduction                                                           | 58  |
| 3.2  | Declaring a Class with a Method and Instantiating an Object of a Class | 59  |
| 3.3  | Declaring a Method with a Parameter                                    | 62  |
| 3.4  | Instance Variables, set Methods and get Methods                        | 64  |
| 3.5  | Primitive Types vs. Reference Types                                    | 68  |
| 3.6  | Initializing Objects with Constructors                                 | 69  |
| 3.7  | Floating-Point Numbers and Type double                                 | 71  |
| 3.8  | (Optional) GUI and Graphics Case Study: Using Dialog Boxes             | 75  |
| 3.9  | Wrap-Up                                                                | 77  |
|      | Chapter 4 Control Statements: Part 1                                   | 84  |
| 4.1  | Introduction                                                           | 85  |
| 4.2  | Algorithms                                                             | 85  |
| 4.3  | Pseudocode                                                             | 85  |
| 4.4  | Control Structures                                                     | 86  |
| 4.5  | if Single-Selection Statement                                          | 88  |
| 4.6  | if...else Double-Selection Statement                                   | 89  |
| 4.7  | while Repetition Statement                                             | 92  |
| 4.8  | Formulating Algorithms: Counter-Controlled Repetition                  | 93  |
| 4.9  | Formulating Algorithms: Sentinel-Controlled Repetition                 | 97  |
| 4.10 | Formulating Algorithms: Nested Control Statements                      | 103 |
| 4.11 | Compound Assignment Operators                                          | 107 |
| 4.12 | Increment and Decrement Operators                                      | 107 |
| 4.13 | Primitive Types                                                        | 110 |
| 4.14 | (Optional) GUI and Graphics Case Study: Creating Simple Drawings       | 110 |
| 4.15 | Wrap-Up                                                                | 113 |
|      | Chapter 5 Control Statements: Part 2                                   | 126 |

|      |                                                                      |     |
|------|----------------------------------------------------------------------|-----|
| 5.1  | Introduction                                                         | 126 |
| 5.2  | Essentials of Counter-Controlled Repetition                          | 127 |
| 5.3  | for Repetition Statement                                             | 128 |
| 5.4  | Examples Using the for Statement                                     | 131 |
| 5.5  | do...while Repetition Statement                                      | 135 |
| 5.6  | switch Multiple-Selection Statement                                  | 136 |
| 5.7  | break and continue Statements                                        | 142 |
| 5.8  | Logical Operators                                                    | 144 |
| 5.9  | Structured Programming Summary                                       | 148 |
| 5.10 | (Optional) GUI and Graphics Case Study: Drawing Rectangles and Ovals | 152 |
| 5.11 | Wrap-Up                                                              | 154 |
|      | Chapter 6 Methods: A Deeper Look                                     | 164 |
| 6.1  | Introduction                                                         | 165 |
| 6.2  | Program Modules in Java                                              | 165 |
| 6.3  | static Methods, static Fields and Class Math                         | 166 |
| 6.4  | Declaring Methods with Multiple Parameters                           | 168 |
| 6.5  | Notes on Declaring and Using Methods                                 | 171 |
| 6.6  | Method-Call Stack and Activation Records                             | 172 |
| 6.7  | Argument Promotion and Casting                                       | 172 |
| 6.8  | Java API Packages                                                    | 173 |
| 6.9  | Case Study: Random-Number Generation                                 | 175 |
| 6.10 | Case Study: A Game of Chance; Introducing Enumerations               | 179 |
| 6.11 | Scope of Declarations                                                | 182 |
| 6.12 | Method Overloading                                                   | 184 |
| 6.13 | (Optional) GUI and Graphics Case Study: Colors and Filled Shapes     | 186 |
| 6.14 | Wrap-Up                                                              | 188 |
|      | Chapter 7 Arrays and ArrayLists                                      | 201 |
| 7.1  | Introduction                                                         | 202 |
| 7.2  | Arrays                                                               | 202 |
| 7.3  | Declaring and Creating Arrays                                        | 203 |
| 7.4  | Examples Using Arrays                                                | 204 |
| 7.5  | Case Study: Card Shuffling and Dealing Simulation                    | 212 |
| 7.6  | Enhanced for Statement                                               | 215 |
| 7.7  | Passing Arrays to Methods                                            | 216 |
| 7.8  | Case Study: Class GradeBook Using an Array to Store Grades           | 219 |
| 7.9  | Multidimensional Arrays                                              | 223 |
| 7.10 | Case Study: Class GradeBook Using a Two-Dimensional Array            | 226 |
| 7.11 | Variable-Length Argument Lists                                       | 230 |
| 7.12 | Using Command-Line Arguments                                         | 232 |
| 7.13 | Class Arrays                                                         | 233 |
| 7.14 | Introduction to Collections and Class ArrayList                      | 235 |
| 7.15 | (Optional) GUI and Graphics Case Study: Drawing Arcs                 | 237 |

7.16 Wrap-Up 240

Chapter 8 Classes and Objects: A Deeper Look 259

8.1 Introduction 260

8.2 Time Class Case Study 260

8.3 Controlling Access to Members 263

8.4 Referring to the Current Object 's Members with the this Reference 264

8.5 Time Class Case Study: Overloaded Constructors 266

8.6 Default and No-Argument Constructors 270

8.7 Notes on Set and Get Methods 271

8.8 Composition 272

8.9 Enumerations 274

8.10 Garbage Collection and Method finalize 276

8.11 static Class Members 277

8.12 static Import 280

8.13 final Instance Variables 281

8.14 Time Class Case Study: Creating Packages 282

8.15 Package Access 286

8.16 (Optional) GUI and Graphics Case Study: Using Objects with Graphics 287

8.17 Wrap-Up 290

Chapter 9 Object-Oriented Programming: Inheritance 298

9.1 Introduction 298

9.2 Superclasses and Subclasses 299

9.3 protected Members 301

9.4 Relationship between Superclasses and Subclasses 302

9.5 Constructors in Subclasses 318

9.6 Software Engineering with Inheritance 319

9.7 Class Object 320

9.8 (Optional) GUI and Graphics Case Study: Displaying Text and Images Using Labels 320

9.9 Wrap-Up 322

Chapter 10 Object-Oriented Programming: Polymorphism 326

10.1 Introduction 327

10.2 Polymorphism Examples 328

10.3 Demonstrating Polymorphic Behavior 329

10.4 Abstract Classes and Methods 331

10.5 Case Study: Payroll System Using Polymorphism 333

10.6 final Methods and Classes 346

10.7 Case Study: Creating and Using Interfaces 346

10.8 (Optional) GUI and Graphics Case Study: Drawing with Polymorphism 356

10.9 Wrap-Up 357

Chapter 11 Exception Handling: A Deeper Look 362

11.1 Introduction 363

11.2 Example: Divide by Zero without Exception Handling 363

|                                                                                 |     |
|---------------------------------------------------------------------------------|-----|
| 11.3 Example: Handling ArithmeticExceptions and InputMismatchExceptions         | 365 |
| 11.4 When to Use Exception Handling                                             | 369 |
| 11.5 Java Exception Hierarchy                                                   | 369 |
| 11.6 finally Block                                                              | 372 |
| 11.7 Stack Unwinding and Obtaining Information from an Exception Object         | 375 |
| 11.8 Chained Exceptions                                                         | 378 |
| 11.9 Declaring New Exception Types                                              | 379 |
| 11.10 Preconditions and Postconditions                                          | 380 |
| 11.11 Assertions                                                                | 381 |
| 11.12 (New in Java SE 7) Multi-catch: Handling Multiple Exceptions in One catch | 382 |
| 11.13 (New in Java SE 7) try-with-Resources: Automatic Resource Deallocation    | 382 |
| 11.14 Wrap-Up                                                                   | 383 |
| Chapter 12 ATM Case Study, Part 1: Object-Oriented Design with the UML          | 388 |
| 12.1 Case Study Introduction                                                    | 388 |
| 12.2 Examining the Requirements Document                                        | 389 |
| 12.3 Identifying the Classes in a Requirements Document                         | 395 |
| 12.4 Identifying Class Attributes                                               | 400 |
| 12.5 Identifying Objects ' States and Activities                                | 404 |
| 12.6 Identifying Class Operations                                               | 407 |
| 12.7 Indicating Collaboration Among Objects                                     | 412 |
| 12.8 Wrap-Up                                                                    | 418 |
| Chapter 13 ATM Case Study Part 2: Implementing an Object-Oriented Design        | 421 |
| 13.1 Introduction                                                               | 422 |
| 13.2 Starting to Program the Classes of the ATM System                          | 422 |
| 13.3 Incorporating Inheritance and Polymorphism into the ATM System             | 425 |
| 13.4 ATM Case Study Implementation                                              | 431 |
| 13.5 Wrap-Up                                                                    | 449 |
| Chapter 14 GUI Components: Part 1                                               | 451 |
