丛书名：Penguin Modern Classics

内容简介

A chemist by training, Primo Levi became one of the supreme witnesses to twentieth-century atrocity. In these haunting reflections inspired by the elements of the periodic table, he ranges from young love to political savagery; from the inert gas argon - and 'inert' relatives like the uncle who stayed in bed for twenty-two years - to life-giving carbon. 'Iron' honours the mountain-climbing resistance hero who put iron in Levi's student soul, 'Cerium' recalls the improvised cigarette lighters which saved his life in Auschwitz, while 'Vanadium' describes an eerie post-war correspondence with the man who had been his 'boss' there. All are written with characteristically understated eloquence and shot through with deep humanity.

作者简介

Primo Levi (1919-1987), an Italian Jew, did not come to the wide attention of the English-reading audience until the last years of his life. A survivor of the Holocaust and imprisonment in Auschwitz, Levi is considered to be one of the century's most compelling voices, and **THE PERIODIC TABLE** is his most famous book. Levi is also the author of the forthcoming **Modern Classics: MOMENTS OF REPRIEVE** and **IF NOT NOW, WHEN?**
