内容简介

This book constitutes the thoroughly refereed proceedings of the 5th International Symposium on Chinese Spoken Language Processing, ISCSLP 2006, held in Singapore in December 2006, colocated with ICCPOL 2006, the 21st International Conference on Computer Processing of Oriental Languages.

The 74 revised full papers presented together with 5 invited papers were carefully reviewed and selected from 183 submissions. The papers are organized in topical sections on topics in speech science, speech analysis, speech synthesis and generation, speech enhancement, acoustic modeling for automatic speech recognition, robust speech recognition, speech adaptation/normalization, general topics in speech recognition, large vocabulary continuous speech recognition, multilingual recognition and identification, speaker recognition and characterization, spoken language understanding, human language acquisition, development and learning, spoken and multimodal dialog systems, speech data mining and document retrieval, machine translation of speech, as well as spoken language resources and annotation.

目录

Plenary

Tutorial

Topics in Speech Science

Speech Analysis

Speech Synthesis and Generation

Speech Enhancement

Acoustic Modeling for Automatic Speech Recognition

Robust Speech Recognition

Speech Adaptation/Normalization

General Topics in Speech Recognition

Large Vocabulary Continuous Speech Recognition

Multilingual Recognition and Identification

Speaker Recognition and Characterization

Spoken Language Understanding

Human Language Acquisition, Development and Learning

Spoken and Multimodal Dialog Systems

Speech data Mining and Document Retrieval

Machine Translation of Speech

Spoken Language Resources and Annotation
