内容简介

The fable of the scientist who creates a man-monster. The dire and terrifying consequences of giving it life are beyond his imagination, as the creature inflicts murder on the human race.

作者简介

MARY WOLLSTONECRAFT SHELLEY (1797-1851) is best known for her Gothic horror story *Frankenstein*.

Born in London in the philosopher William Godwin and his wife Mary Wollstonecraft, the radical feminist writer. Tragically, her mother died almost immediately and Mary was brought up by her father and his second wife. Finding herself bereft of emotional attention, Mary spent much of her childhood reeking, scribbling stories and day-dreaming. She later claimed that her favourite pastime was the 'formation of castles in the air' and it was one such waking dream that led to her most famous creation.
