内容简介

本书的主要内容为通过对形态变化做历时性分析来研究形态变化对语序及主语脱落的影响，形态变化包括形态格和动词的性数一致词缀，都是语序变化及主语脱落的决定性因素。本书结构严谨、富有理论深度，对学界具有较高的实践意义。

目录

List of Abbreviations VI

Introduction XI

Chapter I A Study of the Contemporary Morphological Researches

1.1 Contemporary Morphological Researches on Word Order

1.1.1 Rohrbacher (1999)

1.1.1.1 Strong agreement hypothesis

1.1.1.2 Bobaljik's (2002) view on the strong agreement hypothesis

1.1.2.1 Effects of syntactic structure variation

1.1.2.2 Our view on Bobaljik's (2002) hypotheses

1.1.3 I Nominative case-marking hypothesis

1.1.31 Counterevidence from Faroese

1.1.4 I The hypothesis of overt distinct agreement marking

1.1.4.2 Our view based on Rohrbacher's (1999) counterevidence

1.1.5 H01mbergnd Platzack(1 995) 1

In this chapter, we will introduce some of the contemporary morphological researches on word order and subject omission. We will show that in the analyses of word order variation, most of the contemporary morphological studies are from a synchronic perspective and generally focus on one single aspect of morphology; therefore, they cannot cover all the syntactic differences among human languages. In our opinion, a diachronic comparison of morphological paradigms is quite important in the analysis of syntactic variation.

Moreover, we will show that a single or a few syntactic parameters, as proposed in many

generativists' frameworks (cf Chomsky 1981, 1982; Jaeggli and Safir 1989), cannot cover all the null subject phenomena, because there are three types of null subjects and the licensing condition of each kind of null subject is different. Compared to the generativists' studies, an analysis based on morphological comparison, like Vainikka and Levy's (1999) analysis of the pronominal connection, appears to be more flexible in that different licensing conditions of subject omission are even allowed to be present in one language. Nevertheless, their null subject analysis only considers null thematic subjects, without consideration of null expletives, which is actually a hotly debated topic in syntax.
