内容简介

Of all the first-century partisans of Christianity, only St. Paul left a substantial written legacy. Letters attributed to him comprise a quarter of the New Testament, and another twelfth of its pages—most of the Book of Acts—are devoted to a de*ion of his career.

St. Paul ' s letters are the focus of this volume. Close attention must be paid to them, for they are our most direct and earliest primary sources from the beginning of Christianity.

They are presented here, in the Revised Standard Version, with an introduction and annotations by Wayne A. Meeks.

The letters are accompanied by a selection of critical writings on St. Paul and his influence by some of the foremost religious and philosophical minds of all time.

Together these writings form a thorough introduction to the man who has been called "the second founder of Christianity."
