## 内容简介

Treasure Island, under the title The Sea Cook, was first published as a magazine serial throughout the winter of 1881-82. When it appeared in book form in 1883, it established Stevenson's reputation. He had written it during a rainy holiday in Scotland, partly for the amusement of his American stepson, Lloyd Osbourne. His characters became instantly famous and passed forever into popular culture, especially Long John Silver with his wooden crutch, his greeting, "Jim, lad" and his parrot, Cap'n Flint, who cackled "Pieces of eight!"
