内容简介

The Collins COBUILD Advanced Dictionary of American English, English/Korean is specially designed for Korean-speaking learners of English who need the extra support of their native language. This bilingual learner's dictionary provides Korean translations for all definitions, senses, examples, and explanatory terms to complement the English material and to provide additional support to the learner when they encounter a difficult word or expression.

作者简介

Through a collaborative initiative, Collins COBUILD and Heinle are co-publishing a dynamic new line of learners' dictionaries offering unparalleled pedagogy and learners resources. The first Collins COBUILD dictionary was published in 1987, thanks in part to John Sinclair, one of the very first modern corpus linguists who personally oversaw the creation of the Bank of English(TM). Every COBUILD dictionary is based on the Bank of English(TM), a huge electronic database of both written and spoken language, which today contains over 650 million words.
