内容简介

practice in brief, clinically focused chapters. New to this edition are chapters on bioterrorism and weapons of mass destruction, pharmacology of antimicrobials, antifungals, and antivirals, principles of drug interactions, endocarditis, and abdominal and pelvic pain in the non-pregnant patient. Pharmacologic considerations, tables of vital differential diagnoses, and observation criteria throughout are new features reflecting developments in this dynamic specialty. "considered by most in the discipline to be a bible of emergency medicine"

——Journal of Family Medicine, review of fourth edition.

ENDORSED BY THE AMERICAN COLLEGE OF EMERGENCY PHYSICIANS.

目录

Contributor

Preface

Acknowledgments

Section One Prehospital Care
